

QBS - SALES MODULE

STANDARD OPERATING PROCEDURE MANUAL

Customer Master | Lead & Opportunity | Quotation | Selling Settings | Sales Order | Delivery
Note | Sales Invoice | Payment Entry & Credit Note

Attribute	Value	Attribute	Value
Document Title	QBS Sales Module SOP Manual	Version	1.0
Document Owner		Prepared By	Q10 Analytics Pvt. Ltd.

HOW TO USE THIS MANUAL

This manual defines recommended operating procedures and control checklists for the QBS Sales Module implementation. Exact field names, permissions, and screen labels can vary by client configuration. Where a client-specific workflow differs, the approved configuration and role matrix shall prevail.

QBS SALES CONTROL PHILOSOPHY

- Single Customer Master with tax, credit, and billing mapping.
- O2C flow: Lead → Opportunity → Quotation → Sales Order → Delivery → Invoice → Payment.
- Credit & payment checks before approving Sales Orders.
- System controls for price lists, discounts, and role-based overrides.
- Audit trail from Lead to Cash.

PROCESS ARCHITECTURE & WORKFLOW MAP :

Pre-Implementation & Master Data Checklist

- ☐ Customer Group hierarchy
- ☐ Customer Master setup with Billing/Shipping addresses and contacts
- ☐ Item Master configuration, Item Groups, and Standard Selling Rates / Price Lists
- ☐ Sales Settings and Naming Series

CRM Flow Checklist

- ☐ Lead Creation & Qualification
- ☐ Opportunity Management & Value Estimation
- ☐ Quotation Creation & Approval
- ☐ Customer Master Conversion

Sales Execution Flow Checklist

- ☐ Sales Order Creation (from Quotation or direct)
- ☐ Delivery Note & Stock Reservation / Dispatch
- ☐ Sales Invoice Generation & Accounting Entry
- ☐ Payment Entry & Reconciliation

MASTER DATA SETUP

1. Creating a Customer

To execute sales transactions, customer master records must first be created. Navigate from home to the Selling module and then to Customer under the Customer section (or CRM -> Customer).

- Click on **Add Customer**.

- Enter **Customer Name** and select **Customer Group** from the drop-down list.
- Select **Territory** and **Customer Type** (Company or Individual).

Address and Contacts

Contacts and Addresses are stored separately to allow multiple entries for a single entity. Once a Customer record is saved, options to create these will appear.

- **Access Customer:** Navigate to Selling > Customer and open the record.
- **Add/Edit Address:** Locate the "Addresses and Contacts" section to add or link addresses.
- **Address Details:** Provide specific details such as address type (Billing, Shipping), city, state, and zip code.
- **Link Entities:** Ensure the address is directly linked to the specific Customer record.

Customer Dashboard Connections

The Customer Dashboard provides a centralized view of all related transactions. From here, you can directly create or view:

- Opportunities and Quotations
- Sales Orders and Delivery Notes
- Sales Invoices and Payment Entries
- Specific Pricing Rules

2. Creating a Customer Group

Navigate to **Selling > Customer Group**. Or Search in Awesome Bar (or click ctrl + k) to search Customer Group

- Click **Add Customer Group** and enter the name. Or in Customer Group Tree there is + New in top right corner

- **Hierarchy:** You can set a Parent Customer Group. Ticking the **Is Group** checkbox designates it as a Parent.
- **Defaults:** Assign default Credit Limits and Payment Terms Templates.
- **Visualization:** Use the **Tree View** to manage hierarchies visually.

3. Creating an Item

Navigate to **Stock > Item** or **Selling > Item**.

- Click **Add Item**.
- Enter the Item Code, Name, Group, Opening Stock, default UOM, and standard selling rate.

LEAD & OPPORTUNITY PIPELINE MANAGEMENT

Purpose

Capture prospective clients, track sales interactions, evaluate deal probabilities, and convert qualified prospects into Opportunities and Customers.

Scope

Lead logging, interaction tracking, stage progression, Opportunity conversion, requirement mapping, and deal closing.

Roles and Responsibilities

Role	Responsibility
Sales Representative	Logs leads, conducts discovery calls, updates opportunity stages.
Sales Manager	Reviews pipeline health, reassigns leads, and monitors conversion rates.

Procedure

1. Navigate to Selling Module > CRM > Lead.
2. Click 'Add Lead'. Enter Lead Name, Organization, Lead Source (e.g., Campaign, Referral, Exhibition), Email, and Phone Number.

This screenshot shows the 'CRM / Lead' list view. At the top, there's a breadcrumb 'CRM / Lead' and a '+ Add Lead' button. Below the header, a table lists lead records with columns: ID, Job Title, Status, Organization Name, Territory, Title, and Created On. A 'Filter' button is visible on the right side of the table.

This screenshot shows the 'CRM / Lead / New Lead' form. It includes a 'Not Saved' indicator and a 'Save' button. The form is divided into several sections:

- Lead Information:** Fields for Series (CRM-LEAD-YYYY-), Job Title, Lead Owner (Administrator), Salutation, Gender, Status (Lead), First Name, Middle Name, Last Name, Lead Type, and Request Type.
- Contact Info:** Fields for Email, Mobile No, Phone, Website, WhatsApp, and Phone Ext.
- Organization:** Fields for Organization Name, Annual Revenue, Territory, No of Employees, Industry, and Fax.

3. Assign Lead Owner (Sales Person) and set Status to 'Open'.
4. Log activities, notes, and meeting logs under Activity section.
5. When lead is qualified, click 'Create' button and select 'Opportunity' or 'Customer'.
6. In Opportunity document, set Expected Closing Date, Probability (%), Opportunity Amount, and target items or requirements.
7. Track Opportunity Stage (e.g., Prospecting, Qualification, Proposal, Negotiation, Closed Won, Closed Lost).
8. If deal is won, click 'Create' -> 'Quotation' or 'Sales Order'.

QUOTATION MANAGEMENT & APPROVAL

Purpose

Issue accurate, formal, and authorized pricing quotes to customers, ensuring valid margins, correct tax structures, and delivery schedules.

Scope

Quotation generation, fetching items from Opportunity, applying price lists and discounts, printing/emailing quotes, and tracking conversion.

Roles and Responsibilities

Role	Responsibility
Sales Executive	Drafts Quotation, applies standard pricing, sends quote to prospect.
Sales Manager	Approves quotations exceeding standard discount thresholds or special terms.

Procedure

1. Navigate to Selling Module > Sales > Quotation.
2. Click 'Add Quotation'. Select 'Quotation To' (Customer or Lead) and select the specific party.
3. Optionally click 'Get Items From' -> 'Opportunity' to fetch requirement details.
4. In Items table, select Item Code, Quantity, Rate, and Discount (if authorized).
5. Verify Taxes and Charges Template (e.g., In-State GST vs Out-of-State GST).
6. Set Payment Terms Template and Valid Till date.
7. Save document as Draft. If discount exceeds threshold, submit for Managerial Workflow Approval.
8. Once approved, click 'Submit'. Print standard PDF menu/format or click 'Send Email' to issue directly to customer.
9. Track Status: Draft -> Submitted -> Open -> Replied -> Ordered -> Lost / Expired.

SELLING SETTINGS

Purpose

Maintain global sales control rules, mandatory fields, pricing strategies, credit limit enforcement actions, and discount authorization limits.

Scope

Customer Naming By, Default Price List, Credit Limit enforcement action, Discount control rules, and Role Override permissions.

Roles and Responsibilities

Role	Responsibility
System Admin / HRMS Admin	Configures system parameters in Selling Settings.
Sales Head & Finance Head	Defines credit check thresholds and discount approval policies.

Procedure

1. Navigate to Selling Module > Settings > Selling Settings.
2. Configure 'Customer Naming By' (Customer Name vs Naming Series).
3. Set 'Default Price List' (e.g., 'Standard Selling').

4. Configure Credit Control: Set 'Action If Credit Limit Crosses' to 'Stop' (blocks PO/Sales Order generation) or 'Warn'.
5. Configure 'Role Allowed to Override Credit Limit & Stop Action' (e.g., 'Finance Manager').
6. Set 'Allow Item Price Modification' and discount authorization rules.
7. Save configuration changes and document control change log.

SALES ORDER

Purpose

Convert accepted quotations or purchase orders into legally binding Sales Orders after passing credit checks, stock availability, and margin checks.

Scope

Sales Order creation, fetching from Quotation, customer PO mapping, credit limit check, delivery scheduling, submission, and status monitoring.

Roles and Responsibilities

Role	Responsibility
Sales Operations	Creates and validates Sales Order against Customer PO.
Credit Controller	Approves Sales Orders on credit hold.
Sales Manager	Authorizes final Sales Order submission.

Prerequisites

- Submitted Quotation or valid Customer Purchase Order document.
- Customer record with active status.

Procedure

1. Navigate to Selling Module > Sales > Sales Order.
2. Click 'Add Sales Order'. Select Customer.
3. Click 'Get Items From' -> select 'Quotation' to pull pre-approved items, quantities, and rates.
4. Enter Customer PO Number and Customer PO Date under Customer Purchase Order section.
5. Specify Delivery Date per item or overall required delivery date.
6. Check Tax Withholding, Delivery Warehouse, and Reserved Stock options.
7. Save document. If system triggers 'Credit Limit Exceeded' warning/stop, route to Finance for Credit Hold Release.
8. Submit Sales Order upon approval.
9. Utilize 'Create' button to trigger Delivery Note, Sales Invoice, Material Request, or Production Order.

Controls and Exceptions

- Customer PO Number and Date are mandatory for B2B transactions.
- Sales Orders on Credit Hold cannot proceed to Delivery Note creation.

DELIVERY NOTE & DISPATCH MANAGEMENT

Purpose

Record the physical shipment and transfer of goods from company warehouses to customers, updating inventory balances and driving fulfillment audit trail.

Scope

Delivery Note creation from Sales Order, batch/serial allocation, physical count verification, gate pass issuance, submission, and return handling.

Roles and Responsibilities

Role	Responsibility
Warehouse Incharge	Picks stock, assigns batch/serial numbers, creates Delivery Note.
Logistics Officer	Arranges transport, generates E-Way Bill and Gate Pass.

Prerequisites

- Submitted Sales Order with status 'To Deliver and Bill'.
- Available physical stock in source warehouse.

Procedure

1. Open target Sales Order. Click Create > Delivery Note.
2. Customer details, item list, quantities, warehouse, and rates auto-populate from Sales Order.
3. Select Source Warehouse for fulfillment. If item requires Serial or Batch number, select or scan active Batch/Serial IDs.
4. Verify actual physical dispatch quantity against delivery vehicle loading list.
5. Enter Vehicle No, Transporter Name, and Distance for E-Way Bill integration if required.
6. Save and Submit Delivery Note. Inventory ledger is immediately updated (Stock Outflow).
7. Monitor Status: Draft -> To Bill -> Completed / Closed / Return Issued.

Controls and Exceptions

- Goods must not leave warehouse premises without a submitted Delivery Note and Gate Pass.
- Discrepancies in serial numbers must be resolved prior to submission.

SALES INVOICE MANAGEMENT & GST BILLING

Purpose

Generate statutory sales tax invoices, establish accounting receivables, ensure accurate GST compliance, and recognize revenue upon fulfillment.

Scope

Sales Invoice generation from Sales Order or Delivery Note, GST calculation, e-Invoicing integration, posting date setup, and status tracking.

Roles and Responsibilities

Role	Responsibility
Billing Executive	Creates Sales Invoice, verifies tax rates and billing addresses.
Finance Manager	Reviews tax registers, approves e-Invoice submission.

Prerequisites

- Submitted Sales Order or Delivery Note.
- Configured Tax Accounts and GST Templates.

Procedure

1. Open submitted Sales Order or Delivery Note. Click Create > Sales Invoice.
2. Customer details, items, quantities, pricing, and taxes auto-populate.
3. Verify Posting Date and Payment Due Date according to customer payment terms.
4. Ensure correct GST Template is applied (CGST+SGST for intra-state, IGST for inter-state).
5. If 'Update Stock' is checked (for direct billing without prior Delivery Note), confirm inventory warehouse.
6. Save and Submit Sales Invoice.
7. If e-Invoicing/IRN is enabled, click 'Generate e-Invoice' to retrieve IRN number and QR Code.
8. Track Status: Draft -> Submitted -> Unpaid / Partly Paid / Paid / Overdue / Credit Note Issued.

Controls and Exceptions

- Invoices must not be posted to backdated periods without Finance approval.
- GSTIN details must be verified before e-Invoice IRN generation.

PAYMENT ENTRY

Purpose

Record customer payments, reconcile advance payments against invoices, execute sales returns, and issue credit notes in compliance with financial standards.

Scope

Payment Entry creation, payment matching, advance payment allocation, sales returns, and credit note posting.

Roles and Responsibilities

Role	Responsibility
------	----------------

Accounts Receivable Executive	Records bank receipts, reconciles advances, creates credit notes.
Finance Lead	Approves credit notes and payment write-offs.

Prerequisites

- Submitted Sales Invoice, Sales Order (for advance), or approved Sales Return.
- Bank statement receipt proof / UTR number.

Procedure

1. For Invoice Payment: Open submitted Sales Invoice. Click Create > Payment.
2. Verify Payment Type is set to 'Receive'. Party Type: 'Customer'.
3. Select 'Account Paid To' (Bank/Cash Account) and 'Account Paid From' (Customer Debtors Account).
4. Confirm Received Amount and enter Cheque / Reference No and Date (UTR).
5. For Advance Payments: Open Sales Order -> Click Create -> Payment. Allocate payment as 'Advance'. Upon invoicing, use 'Get Advances Received' to reconcile.
6. For Returns / Credit Notes: Open Sales Invoice -> Click Create -> Credit Note / Return. Enter returned item quantities, save, and submit.
7. Submit Payment Entry or Credit Note. Verify invoice status updates to 'Paid' or 'Partly Paid'.

Controls and Exceptions

- Credit notes must be backed by an authorized Sales Return document or commercial manager approval.
- All bank receipts must include valid bank reference/UTR numbers.
