

QBS - HRMS

STANDARD OPERATING PROCEDURE MANUAL

Employee Lifecycle | Attendance | Mobile & Geofencing | Biometric | Leave | Claims | Approvals
| Monthly Closure

Version 1.0 | September 2026
Prepared for QBS-HRMS implementations
Internal controlled working document

Document Control

Document Title	QBS-HRMS SOP Manual	Version	1.0
Document Owner	HR / QBS Process Owner	Prepared By	Q10 Analytics Pvt. Ltd.
Approved By		Effective Date	
Review Cycle	Annual / major release	Classification	Internal Use
Supersedes	New document	Next Review	

How to Use this Manual

This manual defines recommended operating procedures and control checklists for a QBS-HRMS implementation. Exact field names, permissions and screen labels can vary by client configuration. Where a client-specific workflow differs, the approved configuration and role matrix shall prevail. Screenshots can be inserted later as implementation-specific work instructions without changing the underlying SOP controls.

QBS-HRMS Control Philosophy

- One authoritative Employee master and unique Employee Code per employee.
- Attendance source events should be traceable through check-in and attendance processing.
- Approvals follow the configured authority matrix; direct data changes should not bypass workflow.
- Exceptions use approved regularisation or administrator-controlled correction with audit trail.
- Monthly attendance is reconciled and closed before payroll handover.

SOP Index

SOP	Module / Process	Primary Owner
01	Employee Master Management	HR / HRMS Administrator
02	Shift & Roster Management	HR / HRMS Administrator
03	Attendance Management	HR / HRMS Administrator
04	Mobile Check-in & Geofencing	HR / HRMS Administrator
05	Attendance Regularisation	HR / HRMS Administrator
06	Biometric Attendance Integration	HR / HRMS Administrator
07	Leave Management	HR / HRMS Administrator
08	Holiday & Weekly-Off Management	HR / HRMS Administrator
09	Expense / Claim Management	HR / HRMS Administrator
10	Employee Lifecycle	HR / HRMS Administrator
11	HRMS Approval Matrix	HR / HRMS Administrator
12	HRMS Mobile App - Employee	Employee
13	HRMS Mobile App - Manager / Approver	Manager / Approver
14	HRMS Administrator	HR / HRMS Administrator
15	Monthly Attendance Closure	HR / HRMS Administrator
16	HRMS Exception & Troubleshooting	HR / HRMS Administrator

SOP 01: Employee Master Management

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-01	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Ensure every employee has a complete, unique and correctly mapped HRMS master record before transactions begin.

Scope

Creation, verification, update, transfer and deactivation of Employee records and related user/reporting mappings.

Roles and Responsibilities

Role	Responsibility
HR	Provides approved employee information and validates employment data.
HRMS Administrator	Creates/updates the master and system mappings.
Reporting Manager	Confirms reporting relationship where applicable.
IT/System Administrator	Creates user access when required.

Prerequisites

- Approved joining/employee information is available.
- Employee Code convention is defined.
- Department, designation, branch/location, company and reporting masters exist.

Procedure

1. Search Employee records to ensure the person does not already exist.
2. Create the Employee record using the approved unique Employee Code and legal/display name.
3. Enter employment details: date of joining, department, designation, branch/location, employment type and company.
4. Map the reporting manager and relevant leave/attendance/regularisation approvers as configured.
5. Map the system User ID/mobile user only after identity is verified.
6. Assign holiday list, shift/default shift or other attendance attributes where the implementation requires them.
7. Verify mobile number/email and employee-device mapping requirements before enabling mobile access.
8. Save and validate the record using a maker-checker review for critical fields.
9. For transfers/promotions, update only after approved HR action and preserve effective-date evidence.
10. On separation, disable transactional access at the approved cut-off while retaining historical records.

✓	Check Point	Status / Remarks
☐	No duplicate Employee Code or user mapping.	
☐	Name and joining date verified.	
☐	Department/designation/location correct.	
☐	Reporting manager mapped.	
☐	Leave/regularisation approver mapped where applicable.	
☐	Holiday list and shift attributes verified.	
☐	Biometric Employee Code mapping checked where applicable.	
☐	Mobile user/device access verified where applicable.	
☐	Record independently reviewed.	

SOP 02: Shift & Roster Management

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-02	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Ensure employees are assigned the correct shift so check-ins are interpreted consistently and attendance is generated correctly.

Scope

Shift Type creation, default shift, shift assignment, Day/Night shifts, roster changes and shift exceptions.

Last Updated On

ID	Start Time	End Time	11 of 11
☐ Worker Day Shift	08:00:00	20:00:00	33 m 0
☐ General Shift	09:00:00	18:00:00	33 m 0
☐ Day Shift	08:00:00	20:00:00	2 h 0
☐ Operations Shift	09:00:00	19:00:00	3 h 0
☐ Night Shift	20:00:00	08:00:00	7 h 0
☐ Worker Night Shift	20:00:00	08:00:00	8 h 0
☐ Casual Staff Shift	09:00:00	18:00:00	8 h 0

Roles and Responsibilities

Role	Responsibility
HR/Operations	Approves shift pattern and roster.
HRMS Administrator	Configures Shift Types and assignments.
Reporting Manager	Requests/validates employee shift changes.
Employee	Follows assigned shift and reports discrepancies.

Prerequisites

- Approved shift timings, grace rules and weekly-off rules are defined.
- Employee master exists.
- Attendance source and auto-attendance rules are known.

Procedure

- Create or review Shift Types with approved start/end times and attendance processing settings.
- Where workers use a standard shift, configure the approved default shift only if business rules support it.
- Create Shift Assignments for employees whose shift varies or requires explicit effective dates.
- For Day and Night biometric devices, ensure employee/shift logic is consistent with the integration design.
- Review overlapping assignments before saving a new roster.
- Communicate roster changes before the shift starts wherever practical.

SOP 03: Attendance Management

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-03	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	Daily	Classification	Internal Use

Purpose

Provide a controlled daily process for converting valid check-in/check-out events into accurate employee attendance.

Scope

Mobile/web/biometric punches, Employee Checkin, Attendance records, daily exception review and attendance correction.

Roles and Responsibilities

Role	Responsibility
Employee	Records genuine IN/OUT punches and reports exceptions.
HR/Attendance Team	Reviews daily attendance and exceptions.
Manager/Approver	Approves regularisation where required.
HRMS Administrator	Investigates system/integration exceptions.

Prerequisites

- Employee and shift mappings are valid.
- Attendance source is enabled and tested.
- Holiday/weekly-off rules are configured.

Procedure

1. Review incoming Employee Checkin records for the day.
2. Confirm that IN/OUT events are associated with the correct employee and shift.
3. Allow configured auto-attendance processing to create Attendance where applicable.
4. Review employees with missing IN, missing OUT, insufficient hours, duplicate punches or absent status.
5. Ask employees to use Attendance Regularisation for genuine exceptions requiring approval.
6. Investigate system-side exceptions separately; do not ask employees to regularise a known integration failure until the cause is understood.
7. After approved correction, confirm that the resulting Attendance reflects the approved status.
8. Escalate recurring device, location or integration issues to the HRMS Administrator.

Controls and Exceptions

- Attendance must not be manually altered merely to match expectations without an approved basis.
- Both mobile and biometric punches may coexist only according to the configured business rule; duplicates must not create double attendance.
- Maintain auditability from source punch to check-in, regularisation and final attendance.

✓	Check Point	Status / Remarks
☐	Daily check-in feed reviewed.	
☐	Missing/duplicate punches identified.	
☐	Shift association checked for exceptions.	
☐	Regularisation requests raised where required.	
☐	System failures separated from employee exceptions.	
☐	Approved corrections reflected in Attendance.	
☐	Recurring issues logged for root-cause action.	

SOP 04: Mobile Check-in & Geofencing

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-04	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Ensure mobile attendance is recorded only by authorised employees from permitted locations and devices.

Scope

QBS-HRMS mobile check-in/out, GPS/geolocation validation, attendance radius, permitted locations and Single Device-Single User control.

Roles and Responsibilities

Role	Responsibility
Employee	Uses the authorised device and genuine location for attendance.
HR	Defines approved attendance locations and exceptions.
HRMS Administrator	Configures geofencing and device controls.
Manager	Reviews suspected misuse or genuine field-duty exceptions.

Prerequisites

- Employee mobile user is mapped.
- Location services and required permissions are enabled on the device.
- Approved geofence/location and radius are configured.
- Single Device-Single User rule is configured if adopted.

Procedure

1. Employee opens the QBS-HRMS app and confirms GPS/location services are active.
2. Employee initiates Check In or Check Out from the authorised location.
3. System validates the location against the configured attendance radius and validates device-user rules.
4. Employee confirms successful punch acknowledgement before leaving the location.
5. For a failed punch, employee should capture the error and immediately inform HR/manager rather than repeatedly changing settings or using another person's device.
6. HR reviews genuine field-duty or location exceptions and directs regularisation if policy permits.
7. HRMS Administrator investigates incorrect distance, stale GPS, device mapping or configuration failures.
8. Suspected remote/fraudulent check-ins are escalated for policy action with location evidence retained according to company rules.

Controls and Exceptions

- Attendance radius should be operationally realistic; extremely small radii can create false failures due to GPS accuracy.
- Single Device-Single User prevents unauthorised device sharing and should not be bypassed casually.
- Location evidence should be handled in line with privacy and retention policies.

Comments

Checklist

✓	Check Point	Status / Remarks
☐	Employee-user mapping verified.	
☐	Authorised device verified.	
☐	GPS permission enabled.	
☐	Attendance location and radius validated.	
☐	Single Device-Single User control tested.	
☐	Successful IN/OUT acknowledgement confirmed.	
☐	Failed punches documented and escalated.	
☐	Suspected location misuse reviewed through approved process.	

SOP 05: Attendance Regularisation

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-05	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Provide an auditable approval route for correcting genuine attendance exceptions without uncontrolled manual editing.

Scope

Attendance Request / regularisation submission, approver routing, Team Requests visibility, approval/rejection and final attendance validation.

Roles and Responsibilities

Role	Responsibility
Employee	Submits accurate request with reason and dates.
Regularisation Approver	Reviews and approves/rejects based on evidence.
HR	Monitors ageing and policy compliance.
HRMS Administrator	Maintains approver mapping and resolves workflow visibility issues.

Prerequisites

- Employee master and regularisation approver mapping are correct.
- Attendance exception exists.
- Employee has supporting reason/evidence where policy requires it.

Procedure

1. Employee opens Attendance Regularisation / Attendance Request and selects the affected date(s).
2. Enter the correct reason and relevant details; attach evidence where required.
3. Submit the request through workflow.
4. System routes the request to the configured regularisation approver.
5. Approver reviews actual check-ins, shift, reason and policy before approval/rejection.
6. Approved requests are processed into the corrected attendance outcome according to configuration.
7. HR monitors pending requests before monthly attendance cut-off.
8. If an approver cannot see the request in Team Requests, verify custom_regularisation_approver/user mapping and request status before technical escalation.

Controls and Exceptions

- Approvers must not approve their own exceptions unless policy explicitly allows it.
- Rejected requests should retain reason/comment.
- Do not use regularisation to hide systematic biometric or application failures.
- Requests cancelled or rejected should not alter final attendance.

Checklist

✓	Check Point	Status / Remarks
☐	Correct date range selected.	
☐	Reason is specific and complete.	
☐	Supporting evidence attached if required.	
☐	Configured regularisation approver is correct.	
☐	Request visible to approver.	
☐	Decision recorded with comments where needed.	
☐	Approved correction reflected in Attendance.	
☐	Pending requests cleared before cut-off.	

SOP 06: Biometric Attendance Integration

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-06	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	Daily monitoring / as required	Classification	Internal Use

Purpose

Ensure biometric punches are reliably mapped, processed and reconciled into QBS-HRMS attendance with clear exception handling.

Scope

Biometric Employee Code mapping, Day/Night devices, backend biometric logs, Employee Checkin generation, processing status, reprocessing and reconciliation.

Roles and Responsibilities

Role	Responsibility
HR	Owns employee-code and shift correctness.
IT/Integration Team	Maintains device/database connectivity and log transfer.
HRMS Administrator	Monitors processing into Employee Checkin and resolves application exceptions.
Attendance Team	Reconciles biometric punches with attendance.

Prerequisites

- Biometric devices are commissioned and sending logs to the integration database.
- Employee Codes match the approved QBS mapping.
- Day/Night machine purpose and shift logic are documented.
- Integration service/job is enabled and monitored.

Procedure

1. Verify that the biometric device has received the correct Employee Code mapping.
2. Confirm raw punches are reaching the Biometric Attendance Log / integration table.
3. Monitor unprocessed/error records and processing timestamps.
4. Confirm processed punches create the expected Employee Checkin records with correct employee, time and direction where direction is used.
5. Confirm Employee Checkin records are associated with the correct shift and subsequently produce Attendance according to configured rules.
6. For a gap where biometric logs exist but Employee Checkin is not created, stop at the failed processing layer and inspect the application error before changing employee data.
7. Correct code/configuration defects through controlled deployment; then reprocess only affected unprocessed records after backup/validation.
8. Reconcile sample employees across raw biometric log → Employee Checkin → Attendance after every integration change.
9. Maintain a daily exception count and escalate recurring processing errors.

Controls and Exceptions

- Never mark failed biometric records as processed without confirming downstream Employee Checkin creation.
- Do not bulk reprocess blindly; prevent duplicate Employee Checkin creation.

- Application errors such as malformed update queries or code exceptions must be fixed at source before mass reprocessing.
- Two biometric machines must not create conflicting shift interpretation.

Checklist

✓	Check Point	Status / Remarks
☐	Employee Codes mapped correctly.	
☐	Both Day and Night devices sending data.	
☐	Raw biometric logs received.	
☐	Processing job/service running.	
☐	Error/unprocessed records reviewed.	
☐	Employee Checkin created for sample punches.	
☐	Shift association correct.	
☐	Attendance generated correctly.	
☐	Reprocessing tested for duplicates.	
☐	Daily reconciliation report reviewed.	

Leave types, leave allocation, application, approval, rejection, cancellation, balances and Leave Without Pay where applicable.

Leaves

99+ Leave Policy Assignment 10 +

99+ Leave Allocation +

Title *

FY-2026-2027

Leave Allocations

Leave Policy Details

No.	Leave Type *	Annual Allocation *
1	Casual Leave	24
2	Compensatory Off	0
3	Leave Without Pay	0

Roles and Responsibilities

Role	Responsibility
HR	Maintains leave policy, types and allocations.
Employee	Applies with correct dates and reason.
Leave Approver	Approves/rejects according to policy.
HRMS Administrator	Maintains configuration and resolves workflow issues.

Prerequisites

- Leave policy and Leave Types are approved.
- Leave Approver is mapped.
- Holiday list and employee eligibility are correct.

Procedure

1. HR creates/validates Leave Types and allocation rules.
2. Allocate leave to eligible employees according to approved policy.
3. Employee submits Leave Application with dates, type and reason.
4. System routes the application to the configured Leave Approver.
5. Approver checks balance, work requirements and policy before decision.
6. Approved leave is reflected in leave balance and attendance processing.
7. Cancellation follows workflow and should restore balance only when valid.
8. HR periodically reconciles negative balances, LWP and unusual leave patterns.

Controls and Exceptions

- Leave balances must not be manually adjusted without authorised basis.
- Backdated leave should follow the company cut-off policy.
- Holiday/weekly-off inclusion must follow the configured leave type and policy.

Checklist

✓	Check Point	Status / Remarks
☐	Leave type and eligibility correct.	
☐	Allocation completed.	
☐	Leave approver mapped.	
☐	Dates/reason checked.	
☐	Balance validated.	
☐	Approval/rejection recorded.	
☐	Attendance impact verified.	
☐	Cancellation/reversal checked where applicable.	

SOP 08: Holiday & Weekly-Off Management

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-08	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	Annual / as required	Classification	Internal Use

Purpose

Ensure holidays and weekly offs are consistently applied to the correct employees and locations.

Scope

Holiday Lists, location/company applicability, weekly offs and annual calendar changes.

 > Holiday List		Search or type a command (Ctrl + G)			Help

		☐	F&G(2&4)	01-01-2025	31-12-2026	8 M 0 0

Roles and Responsibilities

Role	Responsibility
HR	Approves annual holiday calendar.
HRMS Administrator	Creates and assigns Holiday Lists.
Managers	Communicate approved local changes.
Employees	Verify their applicable calendar.

Prerequisites

- Approved annual/location-specific holiday calendar is available.
- Employee location/company mapping is current.

Procedure

1. Create Holiday List for the relevant year and location/company.
2. Enter statutory/company holidays and configured weekly offs.
3. Review duplicate or conflicting dates.
4. Assign the correct Holiday List to employees or the relevant default source.
5. Publish the calendar to employees.
6. For mid-year changes, obtain approval, update the list and assess attendance/leave impact.
7. Test a sample employee around a holiday and weekly off.

Controls and Exceptions

- Do not overwrite a historical holiday calendar without assessing past attendance.
- Location-specific holidays must not be applied globally unless approved.

Checklist

✓	Check Point	Status / Remarks
☐	Annual calendar approved.	
☐	Holiday List year correct.	
☐	Weekly offs configured.	
☐	Location/company applicability checked.	
☐	No duplicate/conflicting dates.	
☐	Employee assignment verified.	
☐	Calendar communicated.	
☐	Sample attendance tested.	

SOP 09: Expense / Claim Management

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-09	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Provide a controlled workflow for employee claims, supporting documents, approval and finance handover.

Scope

Employee expense/claim submission, attachments, manager approval, HR/finance review and payment-status handover as configured.

Add Row

Roles and Responsibilities

Role	Responsibility
Employee	Submits genuine claim and evidence.
Approver	Checks business purpose and policy.
Finance	Checks accounting/tax/payment requirements.
HRMS Administrator	Maintains workflow/permissions.

Prerequisites

- Claim categories and limits are defined.
- Approver mapping exists.
- Required supporting-document rules are communicated.

Procedure

1. Employee creates a claim and selects the correct category/date.
2. Enter amount, business purpose and project/cost centre where required.
3. Attach bills/receipts or approved evidence.
4. Submit through workflow.
5. Approver validates purpose, amount and policy.
6. Finance performs final accounting/tax checks where configured.
7. Rejected/returned claims are corrected and resubmitted rather than duplicated.
8. Track approved claims through payment/reimbursement handover.

Controls and Exceptions

- No duplicate claims for the same expense.
- Missing evidence requires documented exception approval where policy permits.
- Approver and claimant segregation should be maintained.

Checklist

✓	Check Point	Status / Remarks
☐	Correct claim category.	
☐	Date and amount verified.	
☐	Purpose/project entered.	
☐	Supporting document attached.	
☐	Duplicate check completed.	
☐	Approval completed.	
☐	Finance status/handover tracked.	

SOP 10: Employee Lifecycle

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-10	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Ensure HRMS records remain aligned with approved employee lifecycle events from joining through separation.

Scope

Joining, probation/confirmation, transfer, promotion, reporting changes and separation.

Roles and Responsibilities

Role	Responsibility
HR	Owns approved lifecycle actions.
Manager	Initiates/validates business changes.
HRMS Administrator	Updates system records and access.
IT/Finance	Acts on access/assets/settlement where applicable.

Prerequisites

- Approved HR action exists.
- Effective date and revised organisation details are known.

Procedure

1. On joining, complete Employee Master, user mapping, shift, holiday, approver and attendance setup before first transaction.
2. For probation/confirmation, record the approved status/effective date according to configured HR process.
3. For transfer/promotion, update department/designation/location/reporting relationships only from the approved effective date.
4. Revalidate leave, shift, holiday and approval mappings after organisational changes.
5. On separation, record relieving date/status and stop future attendance/transaction access at the approved cut-off.
6. Coordinate IT access removal, device mapping release and finance/asset handover according to client policy.
7. Retain historical records for audit and reporting.

Controls and Exceptions

- Lifecycle changes should not erase historical transactions.
- Separation must include access-control action, not only Employee status change.
- Transferred employees must be checked for stale approver and shift mappings.

Checklist

✓	Check Point	Status / Remarks
☐	Joining setup complete.	
☐	Probation/confirmation action recorded.	
☐	Transfer/promotion effective date verified.	
☐	Reporting/approver mapping refreshed.	
☐	Shift/holiday mapping refreshed.	
☐	Relieving date/status correct.	
☐	User/device access disabled on separation.	
☐	Historical records retained.	

SOP 11: HRMS Approval Matrix

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-11	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	Monthly / on organisation change	Classification	Internal Use

Purpose

Ensure all HRMS transactions are routed to the correct authorised approvers and remain visible to them.

Scope

Reporting Manager, Leave Approver, Regularisation Approver and other configured approval roles.

Roles and Responsibilities

Role	Responsibility
HR Head	Approves the authority matrix.
HRMS Administrator	Configures mappings and permissions.
Managers/Approvers	Act on assigned requests.
Internal Control/HR	Periodically reviews the matrix.

Prerequisites

- Approved organisation hierarchy and delegation rules are available.
- User IDs exist for approvers.

Procedure

1. Maintain a controlled matrix of employee/group → transaction type → approver.
2. Map Reporting Manager and specific Leave/Regularisation Approvers as required.
3. Test visibility using representative employee requests before go-live or after major hierarchy changes.
4. Where Team Requests is used, verify the request resource/filter exposes only authorised requests.
5. Update mappings promptly after manager transfer/separation.
6. Review pending requests before deactivating an approver.
7. Perform a periodic access and approval-matrix review.

Controls and Exceptions

- Avoid generic superuser approval for routine operations.
- Approver permissions should follow least privilege.
- Delegation during leave should be approved and time-bound.

Checklist

✓	Check Point	Status / Remarks
☐	Approved matrix available.	
☐	All approvers have active User IDs.	
☐	Reporting Manager mapped.	
☐	Leave Approver mapped.	
☐	Regularisation Approver mapped.	
☐	Team Requests visibility tested.	
☐	Separated/transferred approvers removed.	
☐	Periodic review signed off.	

SOP 12: HRMS Mobile App - Employee

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-12	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Provide employees with a simple and controlled method to use core HRMS self-service functions.

Scope

Login, attendance check-in/out, leave, attendance regularisation, claims and status viewing in the QBS-HRMS mobile app.

Roles and Responsibilities

Role	Responsibility
Employee	Uses own credentials/device and submits accurate transactions.
HR	Supports policy questions.
HRMS Administrator	Supports access/configuration issues.

Prerequisites

- Employee has active user access.
- Authorised device is available.
- Required location permissions are enabled for attendance.

Procedure

1. Login using personal credentials; never share login or device access.
2. Check profile, reporting/approver details and notify HR if incorrect.
3. For attendance, use Check In/Check Out and confirm successful acknowledgement.
4. For leave, submit Leave Application with correct type, dates and reason.
5. For attendance exceptions, submit Attendance Regularisation with specific reason.
6. For claims, enter correct details and attach required evidence.
7. Use request/status views to track approval; do not create duplicates merely because approval is pending.
8. Logout or secure the device when not in use and report lost/replaced devices promptly.

Controls and Exceptions

- Employee must not use another employee's account or device to record attendance.
- Failed attendance transactions should be reported promptly with screenshot/error details.
- Personal credentials must remain confidential.

Checklist

✓	Check Point	Status / Remarks
☐	Login successful.	
☐	Profile and approver details checked.	
☐	GPS/device permission correct.	
☐	Check-in/out acknowledgement verified.	
☐	Leave request submitted correctly.	
☐	Regularisation used only for genuine exceptions.	
☐	Claims include evidence.	
☐	Pending status checked before resubmission.	

SOP 13: HRMS Mobile App - Manager / Approver

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-13	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Enable managers to review and decide team HR requests consistently and promptly.

Scope

Team Requests for leave, claims, shift/attendance requests and Attendance Regularisation where enabled.

Roles and Responsibilities

Role	Responsibility
Manager/Approver	Reviews facts and policy before decision.
HR	Monitors overdue approvals and escalations.
HRMS Administrator	Resolves visibility/permission issues.

Prerequisites

- Approver user mapping is active.
- Team Requests resources/permissions are configured.

Procedure

1. Open Team Requests and select the relevant request category.
2. Review employee, date range, reason, supporting data and current status.
3. For attendance regularisation, compare the request with available check-ins and shift information.
4. Approve only when the request is supported and within policy; otherwise reject/return with a meaningful comment.
5. Avoid leaving requests pending beyond the agreed SLA/cut-off.
6. If a legitimate team request is not visible, confirm approver mapping and request status, then escalate to HRMS Administrator.
7. Review pending queue before planned leave or role change.

Controls and Exceptions

- Managers should only see requests within authorised scope.
- Approval comments should be sufficient to explain exceptions.
- No approval should be based solely on verbal instruction when workflow evidence is required.

Checklist

✓	Check Point	Status / Remarks
☐	Correct request category selected.	
☐	Employee/date/reason reviewed.	
☐	Attendance/check-in evidence reviewed where relevant.	
☐	Policy/limit checked.	
☐	Decision/comment recorded.	
☐	Pending queue within SLA.	
☐	Missing visibility escalated with request ID.	

SOP 14: HRMS Administrator

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-14	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	Weekly review / as required	Classification	Internal Use

Purpose

Define controlled administration practices for HRMS configuration, permissions, integrations and support.

Scope

User/role administration, HRMS settings, masters, geofencing, device controls, workflow configuration, integration monitoring and change management.

Roles and Responsibilities

Role	Responsibility
HRMS Administrator	Maintains configuration and technical controls.
HR Process Owner	Approves business-rule changes.
IT/System Admin	Supports infrastructure/security.
QBS Support/Developer	Deploys approved code changes and fixes.

Prerequisites

- Administrator access is restricted to authorised personnel.
- Production changes follow an approved change process.
- Backup/rollback method exists for material changes.

Procedure

1. Maintain master data, roles and permissions using least-privilege principles.

2. Configure HRMS settings only from approved business rules.
3. Maintain attendance locations/radius and Single Device-Single User settings where used.
4. Monitor biometric/integration jobs and application errors.
5. Test workflow filters and Team Requests after changes to custom approval logic.
6. Use UAT/staging for code/configuration changes where feasible.
7. Document change request, test evidence, deployment date and rollback plan.
8. Review inactive users, stale approvers, failed jobs and unusual exceptions periodically.
9. Maintain an issue log with root cause and permanent corrective action for recurring problems.

Controls and Exceptions

- Avoid direct database updates except controlled technical recovery with backup and validation.
- Never use production as the first test environment for material logic changes.
- Admin privileges should not be used for routine employee transactions.

Checklist

✓	Check Point	Status / Remarks
☐	Admin access list reviewed.	
☐	Roles/permissions least privilege.	
☐	Attendance settings documented.	
☐	Geofence/device controls tested.	
☐	Biometric jobs monitored.	
☐	Approval filters tested.	
☐	Change record approved.	
☐	Backup/rollback available.	
☐	Issue log/root cause updated.	

SOP 15: Monthly Attendance Closure

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-15	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	Monthly	Classification	Internal Use

Purpose

Ensure monthly attendance is complete, approved and reconciled before payroll handover.

Scope

End-of-month reconciliation of check-ins, biometric logs, leave, regularisation, attendance exceptions and closure sign-off.

Roles and Responsibilities

Role	Responsibility
Attendance/HR Team	Performs reconciliation and closure.
Managers/Approvers	Clear pending requests by cut-off.
HRMS Administrator	Resolves system exceptions.
Payroll/Finance	Accepts final attendance input.

Prerequisites

- Monthly cut-off calendar is communicated.
- Daily attendance processing has been monitored.
- Approvers know the deadline.

Procedure

1. Freeze the reporting period for review and generate exception lists.
2. Reconcile biometric/raw logs against Employee Checkin for unresolved integration gaps.
3. Review missing IN/OUT, absent, insufficient hours, duplicate punches and shift exceptions.
4. Ensure leave applications affecting the month are approved/rejected.
5. Ensure Attendance Regularisation requests are approved/rejected by cut-off.
6. Resolve system-side failures and reprocess only validated affected records.
7. Run final employee-wise attendance summary and spot-check high-risk exceptions.
8. Obtain HR/authorised sign-off on final attendance.
9. Provide the approved attendance output to payroll/finance.
10. Restrict retrospective changes after closure; reopen only through approved exception process.

Controls and Exceptions

- Payroll should not proceed from an attendance period with unresolved material exceptions.
- Late changes after payroll handover require documented impact assessment.
- Retain closure checklist and exception evidence for audit.

Checklist

✓	Check Point	Status / Remarks
☐	Raw biometric/check-in reconciliation complete.	
☐	Missing/duplicate punch exceptions cleared.	
☐	Leave requests cleared.	
☐	Regularisation requests cleared.	
☐	Shift exceptions resolved.	
☐	System processing errors cleared.	

✓	Check Point	Status / Remarks
☐	Final attendance summary reviewed.	
☐	HR sign-off obtained.	
☐	Payroll handover completed.	
☐	Period locked/controlled for retrospective changes.	

SOP 16: HRMS Exception & Troubleshooting

Document	QBS-HRMS SOP Manual	Version	1.0
SOP Code	QBS-HRMS-16	Process Owner	HR / HRMS Administrator
Effective Date	To be approved	Review Cycle	Annual / on major system change
Frequency	As required	Classification	Internal Use

Purpose

Provide a structured diagnostic path so HRMS issues are corrected at the right layer without creating secondary errors.

Scope

Common issues involving biometric logs, Employee Checkin, Attendance, geolocation, Single Device-Single User, shifts and approval visibility.

Roles and Responsibilities

Role	Responsibility
User/Employee	Reports issue with exact time and evidence.
HR	Classifies policy vs system issue.
HRMS Administrator	Diagnoses configuration/application layer.
IT/Developer	Fixes infrastructure/code defects where required.

Prerequisites

- Issue ID, employee, date/time and error message are captured.
- Recent changes are known.

Procedure

1. Classify the issue: user/policy, master data, configuration, integration, application code or infrastructure.
2. Trace attendance issues layer by layer: source punch → raw biometric/mobile event → Employee Checkin → shift association → Attendance → regularisation.
3. If Biometric Attendance Log receives data but Employee Checkin is missing, inspect processing status/error before touching Attendance.
4. For geofence failure, verify actual GPS reading, configured location/radius, permissions and device mapping.
5. For Single Device-Single User failure, verify authorised device mapping and whether the employee changed/replaced the device.
6. For incorrect attendance, verify shift assignment/default shift and overlapping assignments.
7. For missing Team Requests, verify request status, custom regularisation approver/user mapping, permissions and configured list/resource filters.
8. After correction, retest the original scenario and confirm no duplicate or unintended records were created.
9. Record root cause, corrective action and preventive action for recurring incidents.

Controls and Exceptions

- Do not jump directly to database correction when the root cause is unknown.
- Preserve logs and screenshots before reprocessing.
- Bulk corrections require backup, sample validation and post-change reconciliation.

Checklist

✓	Check Point	Status / Remarks
☐	Issue ID and exact error captured.	
☐	Employee/date/time captured.	
☐	Source punch verified.	

✓	Check Point	Status / Remarks
☐	Raw integration/mobile event verified.	
☐	Employee Checkin verified.	
☐	Shift mapping verified.	
☐	Attendance outcome verified.	
☐	Approver/permission mapping checked if workflow issue.	
☐	Fix tested on original scenario.	
☐	Duplicate check completed.	
☐	Root cause and preventive action documented.	

Master QBS-HRMS Go-Live / Periodic Control Checklist

Area	Control Check	Status	Remarks / Owner
Organisation & Masters	Employee codes unique and complete	☐	
Organisation & Masters	Departments, designations, branches/locations and reporting hierarchy validated	☐	
Organisation & Masters	Leave and regularisation approvers mapped	☐	
Attendance	Shift Types/default shifts/assignments validated	☐	
Attendance	Holiday Lists and weekly offs assigned	☐	
Attendance	Mobile check-in tested at authorised locations	☐	
Attendance	Attendance radius tested under real GPS conditions	☐	
Attendance	Single Device-Single User control tested where enabled	☐	
Biometric	Employee Code mapping reconciled with biometric devices	☐	
Biometric	Day and Night machines sending logs	☐	
Biometric	Raw log → Employee Checkin → Attendance tested end-to-end	☐	
Workflow	Leave approval tested	☐	
Workflow	Attendance Regularisation approval tested	☐	
Workflow	Team Requests visibility tested for managers	☐	
Workflow	Expense/Claim workflow tested if in scope	☐	
Security	Roles and permissions reviewed for least privilege	☐	
Security	Separated/inactive users disabled	☐	
Operations	Daily exception-monitoring responsibility assigned	☐	
Operations	Monthly attendance cut-off and closure calendar issued	☐	
Support	Issue escalation matrix and support contacts published	☐	
Support	Backup/change/reprocessing procedure documented	☐	
Governance	SOP training completed for HR, managers and employees	☐	

Monthly HRMS Control Sign-off

Control	Owner	Status	Remarks
Biometric/check-in processing reconciled	HRMS Admin	☐	

Control	Owner	Status	Remarks
Pending attendance exceptions cleared	HR	☐	
Leave and regularisation approvals cleared	Managers / HR	☐	
Attendance closure completed	HR	☐	
Payroll handover completed	HR / Payroll	☐	
Inactive users / stale approvers reviewed	HRMS Admin	☐	
Recurring incidents reviewed for RCA/CAPA	HR / HRMS Admin	☐
