How to Use this Manual

This manual is designed for ERPNext Accounting training and operational reference. Complete the prerequisite and configuration checklists before creating routine accounting transactions. Each SOP section contains purpose, prerequisites, navigation, steps, expected result, and a reserved area for manually adding screenshots.

ERPNext Accounting follows double-entry accounting: every accounting transaction has corresponding debit and credit entries and Total Debit = Total Credit.

Accounting Control Philosophy

Overall flow:

Company Setup → Chart of Accounts → Accounting Settings & Defaults → Accounting Masters → Accounting Transactions → Accounting Entries → General Ledger → Reconciliation → Financial Reports → Period Closing

Core verification flow:

Business Transaction → ERPNext Document → Save → Submit → Accounting Entry → General Ledger → Relevant Financial Report

SOP Index

1. Company Setup
2. Chart of Accounts
3. Accounts Settings & Defaults
4. Opening Balances / Initial Setup
5. Customer Master

9. Tax / GST Accounts & Templates
10. Purchase Transactions
11. Sales Transactions
12. Payment Entry
13. Journal Entry
14. Credit Note & Debit Note
15. Payment Reconciliation
16. General Ledger
17. Accounts Receivable
18. Accounts Payable
19. Profit & Loss
20. Balance Sheet
21. Trial Balance & Accounting Verification
22. Closing Books / Period Closing
23. Accounting Reports & Control Checks
24. Common Errors & Troubleshooting

Accounting Module – Prerequisite & Go-Live Checklist

Company Setup

- ☐ Company is created.
- ☐ Company abbreviation is configured.
- ☐ Default currency is configured.
- ☐ Country is selected.
- ☐ Fiscal year is available.
- ☐ Required company defaults are configured.
- ☐ Company address and tax information are available where required.

Chart of Accounts

- ☐ Required account groups are available.
- ☐ Required ledger accounts are created.
- ☐ Receivable account is available.
- ☐ Payable account is available.
- ☐ Bank/Cash accounts are available.
- ☐ Sales/Income accounts are available.
- ☐ Purchase/Expense/Asset accounts are available.
- ☐ Required tax accounts are available.
- ☐ Accounts belong to the selected Company.

Accounting Settings

- ☐ Accounts Settings has been reviewed.
- ☐ Invoice and Billing settings are configured.
- ☐ Payment settings are configured.
- ☐ Credit limit settings are reviewed where applicable.
- ☐ Accounts Closing settings are reviewed.
- ☐ Document naming settings are reviewed where required.

Opening Balances

- ☐ Approved cut-off date is identified.
- ☐ Previous-system closing balances / Trial Balance are available.
- ☐ Opening balances are prepared and verified.
- ☐ Customer and Supplier opening balances are verified where applicable.
- ☐ Bank, Cash, Stock, Fixed Asset, Loan and Equity balances are verified where applicable.
- ☐ Opening Trial Balance is balanced.

Masters

- ☐ Customer records are available.
- ☐ Supplier records are available.
- ☐ Item records are available where required.
- ☐ Item Group and UOM are available where required.
- ☐ Warehouse is available for stock items.
- ☐ Bank Account is configured where required.

☐ Addresses and contacts are available where required.

Tax / GST

☐ Input tax accounts are available.

☐ Output tax accounts are available.

☐ Sales Tax Template is configured where required.

☐ Purchase Tax Template is configured where required.

☐ Item Tax Template is configured where required.

☐ Tax Rules are configured where required.

☐ Applicable GST treatment/rates are verified.

Transaction Readiness

☐ Required accounts are not disabled.

☐ Required masters are saved correctly.

☐ User has permission to create and submit transactions.

☐ Posting date is within the applicable accounting period.

☐ Cost Centers / Accounting Dimensions are configured where required.

Reporting / Verification

☐ General Ledger can be checked.

☐ Accounts Receivable can be generated.

☐ Accounts Payable can be generated.

☐ Profit & Loss can be generated.

☐ Balance Sheet can be generated.

☐ Trial Balance can be generated and reviewed.

☐ Reconciliation and period-closing procedures are defined.

1. Company Setup

Purpose

The Company master represents the legal/business entity for which accounting transactions are recorded and maintains company-related accounting information.

Prerequisites

- ☐ Company information available
- ☐ Default currency identified
- ☐ Fiscal year available
- ☐ Appropriate permissions available

Navigation

Search → Company → New/Add Company

Steps

Step 1: Create or open Company

Step 2: Enter company information

Step 3: Set abbreviation and country

Step 4: Set default currency

Step 5: Review company defaults

Step 6: Save and verify Company

Expected Result

Company is created and available for accounting configuration and transactions.

Important

Verify the correct Company, abbreviation and currency before creating accounting transactions.

2. Chart of Accounts

Purpose

The Chart of Accounts organizes the accounts required for accounting transactions and financial reporting under Assets, Liabilities, Equity, Income and Expenses.

Prerequisites

- ☐ Company created
- ☐ Correct Company selected
- ☐ Required account structure identified
- ☐ Fiscal Year configured
- ☐ Accounting permissions available

Navigation

Search → Chart of Accounts → Select Company → Select parent account → Add Child

Steps

Step 1: Open Chart of Accounts

Step 2: Select Company

Step 3: Review account structure

Step 4: Identify required account

Step 5: Select the correct parent

Step 6: Create or modify the required account

Expected Result

Required ledger account is available under the appropriate account group.

Important

Check whether an account already exists before creating a new one. Use ledger accounts for transaction postings rather than group accounts.

3. Accounts Settings & Defaults

Purpose

Accounts Settings is used to configure accounting-related system behaviour and settings.

Prerequisites

- ☐ Company configured
- ☐ Accounting requirements identified
- ☐ Appropriate permissions available

Navigation

Search → Accounts Settings

Steps

Step 1: Open Accounts Settings

Step 2: Review Invoice and Billing settings

Step 3: Review Payments settings

Step 4: Review Credit Limits

Step 5: Review Assets and Accounts Closing

Step 6: Save required settings

Expected Result

Required accounting settings are saved and applied according to the configured options.

4. Opening Balances / Initial Setup

Purpose

Opening balances represent the verified financial position at the date the company starts using ERPNext and bring approved closing balances from the previous system/books into ERPNext.

Prerequisites

- ☐ Company created
- ☐ Chart of Accounts configured
- ☐ Fiscal Year available
- ☐ Company defaults configured
- ☐ Approved closing Trial Balance available
- ☐ Customers/Suppliers available where applicable
- ☐ Cost Centers / Accounting Dimensions configured where required

Navigation

Accounting → Journal Entry / relevant Opening Balance process

Steps

Step 1: Finalize previous-system closing books

Step 2: Determine cut-off date

Step 3: Prepare and verify Trial Balance

Step 4: Configure ERPNext masters

Step 5: Create opening entries

Step 6: Submit and verify opening entries

The screenshot shows the 'Payments / Journal Entry' page in ERPNext. It displays a table of journal entries with columns for ID, Company, Entry Type, Title, Total Debit, ID, and Created On. There are three entries listed, all for 'Dhana Electronics'. The first two are 'Journal Entry' type, and the third is 'Opening Entry' type.

ID	Company	Entry Type	Title	Total Debit	ID	Created On
			☐ Title			3 of 3
			☐ Cash - DE	₹ 20,000.00	ACC-JV-2026-00003	2 d
			☐ Electricity Expense - DE	₹ 2,000.00	ACC-JV-2026-00002	2 d
			☐ Cash - DE	₹ 1,05,000.00	ACC-JV-2026-00001	3 d

Expected Result

Opening balances are posted and the ERPNext accounting position agrees with the approved source balances.

Important

Opening balances represent the closing position at the cut-off date, not new business transactions.

5. Customer Master

Purpose

The Customer master maintains information required for sales and receivable transactions.

Prerequisites

- ☐ Company created
- ☐ Customer details available
- ☐ Customer Group available
- ☐ Receivable account configured

Navigation

QBS-Manufacturing | Standard Operating Procedure Manual
Search → Customer → Check existing record → New/Add

Steps

Step 1: Search for an existing Customer

Step 2: Avoid duplicate customer records

Step 3: Create Customer if required

Step 4: Enter basic details

Step 5: Select Customer Group and applicable information

Step 6: Save and verify Customer

Expected Result

Customer is available for Sales Invoices and customer-related payment transactions.

6. Supplier Master

Purpose

The Supplier master maintains information required for purchase and payable transactions.

Prerequisites

- ☐ Company created
- ☐ Chart of Accounts configured
- ☐ Default Payable Account configured
- ☐ Supplier Group available
- ☐ Supplier details available

Navigation

Search → Supplier → Check existing record → New/Add

Steps

Step 1: Search for an existing Supplier

Step 2: Avoid duplicate supplier records

Step 3: Create Supplier if required

Step 4: Enter supplier details

Step 5: Enter applicable tax details

Step 6: Save and verify Supplier

**Expected Result**

Supplier is available for Purchase Invoices and supplier payment transactions.

Important

Enter tax information only where applicable and supported by supplier documentation.

7. Item & Accounting Master Setup

Purpose

The Item master represents products, materials, components or services used across purchasing, sales, stock, manufacturing and accounting.

Prerequisites

- ☐ Company created
- ☐ Item Group available
- ☐ Warehouse available for stock items
- ☐ UOM available
- ☐ Accounting and valuation setup available

Navigation

Search → Item → New/Add

Steps

Step 1: Verify Item Group

Step 2: Verify Warehouse and UOM

Step 3: Create Item

Step 4: Enter Item Code and Name

Step 5: Configure stock, purchase and sales options

Step 6: Configure item defaults and accounting details

ID	Item Name	Item Group	UOM	Item Type	Purpose	ID	Created On
☐ Laptop	Enabled	Products	Nos	Stock	Sales & Purchase	LAPTOP-001	2 d

Expected Result

Item is available for the required purchasing, sales, stock and accounting transactions.

8. Bank Account Setup

Purpose

The Bank Account master maintains bank account details used for receiving and making payments.

Prerequisites

- ☐ Company created
- ☐ Bank/financial account details available
- ☐ Corresponding ledger account available

Navigation

Search → Bank Account → New/Add

Steps

Step 1: Open Bank Account

Step 2: Select Company

Step 3: Enter bank account details

Step 4: Select corresponding account/ledger where required

Step 5: Save

☐ Is Company Account
Setting the account as a Company Account is necessary for Bank Reconciliation

☐ Is Credit Card
If checked, journal entries made using bank reconciliation will be of type "Credit Card Entry"

Expected Result

Bank Account is available for payment transactions.

9. Tax / GST Accounts & Templates

Purpose

Tax Accounts and Tax Templates are used to calculate and post applicable taxes on sales and purchase transactions.

Prerequisites

- ☐ Company configured
- ☐ Required tax accounts created
- ☐ Applicable tax treatment/rates identified
- ☐ Customer/Supplier and Items available where required

Navigation

Accounting → Chart of Accounts / Taxes

Steps

- Step 1: Create or verify input/output tax accounts
- Step 2: Create Sales Taxes and Charges Template
- Step 3: Create Purchase Taxes and Charges Template
- Step 4: Configure Item Tax Template where required
- Step 5: Configure Tax Rule where required
- Step 6: Test a sales/purchase transaction
- Step 7: Verify tax calculation and accounts

Administrator
admin@example.com

20 100 500 2500

Expected Result

Applicable tax is calculated and posted to the intended tax accounts.

Important

GST treatment must be based on the applicable business transaction and tax configuration; do not assume a single rate applies universally.

10. Purchase Transactions

Purpose

Purchase Transactions record the procurement process from supplier transaction through receipt, supplier billing and payment.

Prerequisites

- ☐ Company configured
- ☐ Supplier created
- ☐ Item created
- ☐ Warehouse available where required
- ☐ Chart of Accounts configured
- ☐ Buying settings reviewed
- ☐ Purchase Taxes and Charges configured where required
- ☐ Bank/Cash account available

Navigation

Buying → Purchase Order → Purchase Receipt → Purchase Invoice → Payment Entry

Steps

- Step 1: Verify purchase setup
- Step 2: Create and submit Purchase Order
- Step 3: Receive goods and create Purchase Receipt
- Step 4: Verify stock and warehouse
- Step 5: Create and submit Purchase Invoice
- Step 6: Verify supplier payable
- Step 7: Create and submit Payment Entry

QBS ERPNext Accounting Module SOP Manual | Version 1.0

Expected Result

Purchase documents, stock where applicable, supplier payable and payment are recorded and can be verified through relevant ledgers/reports.

Important

Do not duplicate stock movement when a Purchase Receipt has already recorded the receipt.

11. Sales Transactions

Purpose

Sales Transactions record the process of selling goods or services to customers through order, delivery, invoicing and payment.

Prerequisites

- ☐ Company configured
- ☐ Customer created
- ☐ Item created
- ☐ Selling price/item price available where required
- ☐ Warehouse and stock available where applicable
- ☐ Taxes configured
- ☐ Selling settings reviewed

Navigation

Selling → Sales Order → Delivery Note → Sales Invoice → Payment Entry

Steps

Step 1: Verify Customer and Item

Step 2: Create and submit Sales Order

Step 3: Prepare or deliver goods where applicable

Step 4: Create and submit Sales Invoice

Step 5: Verify customer receivable

Step 6: Record customer payment

Step 7: Verify receivable and accounting reports

The screenshot displays the 'Invoicing / Sales Invoice' page in the QBS ERPNext application. The interface includes a sidebar with navigation options like Home, Dashboard, Chart of Accounts, Receivables, Sales Invoice, Credit Note, Accounts Receivable, Payables, Payments, Reports, and Settings. The main area shows a table of sales invoices with columns for ID, Company, Customer, Customer Name, Posting Date, Status, Payment Due Date, Grand Total, and ID. The table lists six invoices, with statuses including Paid, Return, Credit Note Issued, and Draft. A 'Filter' button and a 'Created On' dropdown are visible above the table. The bottom of the page shows a pagination bar with values 20, 100, 500, and 2500.

ID	Company	Customer	Customer Name	Posting Date	Status	Payment Due Date	Grand Total	ID	6 of 6
	ABC Pvt. Ltd.			21-09-2026	Paid	21-09-2026	₹ 1,050.00	ACC-SINV-2026-00--	2 d 0 0
	ABC Pvt. Ltd.			21-09-2026	Paid	21-09-2026	₹ 1,050.00	ACC-SINV-2026-00--	2 d 0 0
	ABC Pvt. Ltd.			17-09-2026	Return	17-09-2026	₹ -10,000.00	ACC-SINV-2026-00--	2 d 0 0
	ABC Pvt. Ltd.			17-09-2026	Credit Note Issued	17-09-2026	₹ 10,000.00	ACC-SINV-2026-00--	2 d 0 0
	ABC Pvt. Ltd.			17-09-2026	Draft	17-09-2026	₹ 10,000.00	ACC-SINV-2026-00--	6 d 0 0
	ABC Pvt. Ltd.			17-09-2026	Draft	17-09-2026	₹ 10,000.00	ACC-SINV-2026-00--	6 d 0 0

Expected Result

Sales transaction, customer receivable, applicable stock/accounting entries and payment are recorded correctly.

Important

Depending on the business process, some stages may be skipped.

12. Payment Entry

Purpose

Payment Entry records money received, paid or transferred. It can be used for customer receipts, supplier payments, partial payments, advances and internal transfers.

Prerequisites

- ☐ Company available
- ☐ Customer or Supplier available where applicable
- ☐ Bank/Cash account available
- ☐ Mode of Payment available where required
- ☐ Source transaction available where payment is against an invoice

Navigation

Accounting → Accounts Receivable/Payable → Payment Entry → New

Steps

Step 1: Select Payment Type

Step 2: Select Company and date

Step 3: Select Party where applicable

Step 4: Verify Paid From / Paid To

Step 5: Enter payment amount and reference

Step 6: Fetch or select outstanding invoice

Step 7: Allocate payment

Step 8: Verify Difference and Unallocated Amount

Step 9: Save and Submit

localhost:8000/desk/payment-entry

Invoicing / Payment Entry

List View Saved Filters + Add Payment Entry

ID ≈ Payment Type Posting Date Party Type Party Filter x Created On

Title	Status	Payment Type	Posting Date	Account Paid From	Account Paid To	3 of 3
XYZ Stationers	Submitted	Pay	21-09-2026	Q10 main bank - Q	Creditors - Q	2 d 0
ABC Pvt. Ltd. - 1	Submitted	Receive	21-09-2026	Debtors - Q	Q10 main bank - Q	2 d 0
ABC Pvt. Ltd. - 1	Submitted	Receive	17-09-2026	Debtors - Q	Q10 main bank - Q	2 d 0

Expected Result

Payment is recorded and, where allocated, the related outstanding amount is adjusted.

Important

Verify allocation before submission.

13. Journal Entry

Purpose

Journal Entry records accounting transactions directly through debit and credit accounts. Every Journal Entry must have equal Total Debit and Total Credit before submission.

Prerequisites

- ☐ Company available
- ☐ Required ledger accounts available
- ☐ Correct debit/credit treatment identified
- ☐ Cost Center / Dimensions available where required
- ☐ Party/reference information identified where required

Navigation

Accounting → General Ledger → Journal Entry → New

Steps

Step 1: Identify accounting transaction

Step 2: Determine debit and credit accounts

Step 3: Select Company and Posting Date

Step 4: Enter accounting rows

Step 5: Add party/reference/dimensions where required

Step 6: Verify Total Debit = Total Credit

Step 7: Add remark

Step 8: Save, review and Submit

Expected Result

Journal Entry is submitted and its accounting effect is posted to the General Ledger.

Important

Do not enter both Debit and Credit on the same row.

14. Credit Note & Debit Note

Purpose

Credit Notes and Debit Notes are used to adjust customer receivables and supplier payables for applicable corrections, returns or additional amounts.

Prerequisites

- ☐ Customer/Supplier available
- ☐ Original Sales/Purchase Invoice available where applicable
- ☐ Required accounts and tax setup available

Navigation

Search → Credit Note / Debit Note → New

Steps

Step 1: Open the required adjustment document

Step 2: Select Customer or Supplier

Step 3: Reference original invoice where applicable

Step 4: Enter items/amounts and applicable taxes

Step 5: Verify totals

Step 6: Save and Submit

**Expected Result**

Customer receivable or supplier payable is adjusted according to the submitted note.

15. Payment Reconciliation

Purpose

Payment Reconciliation is used to match payments with outstanding invoices and allocate the payment against the relevant invoice.

Prerequisites

- ☐ Customer/Supplier available
- ☐ Invoice available
- ☐ Payment Entry available
- ☐ Receivable/Payable account configured

Navigation

Search → Payment Reconciliation

Steps

Step 1: Select Company

Step 2: Select Party Type

Step 3: Select Party

Step 4: Select Receivable/Payable Account

Step 5: Get Unreconciled Entries

Step 6: Select Payment and Invoice

Step 7: Allocate

Step 8: Verify allocation and difference

Step 9: Reconcile

The screenshot displays the 'Payment Reconciliation' screen in QBS ERPNext. The browser address bar shows the URL: localhost:8000/desk/payment-reconciliation/Payment%20Reconciliation. The sidebar on the left contains the following menu items: Invoicing (ERPNext), Search (Ctrl+K), Notification (2), Accounts Payable, Payments (dropdown), Payment Entry, Journal Entry, Payment Request, Payment Order, Payment Reconciliation (highlighted), Unreconcile Payment, Process Payment Reco..., Repost Accounting Led..., Repost Payment Ledger, Reports, Settings, Getting Started, and a user profile for Administrator (admin@example.com).

The main form area is titled 'Invoicing / Payment Reconciliation' and includes a 'Get Unreconciled Entries' button. The form contains the following fields:

- Company ***: Q10
- Party ***: ABC Pvt. Ltd. - 1
- Party Type ***: Customer
- Receivable / Payable Account ***: Debtors - Q
- Default Advance Account**: (empty)

Below the form, there is a note: 'Only 'Payment Entries' made against this advance account are supported.'

The **Filters** section includes the following fields:

- From Invoice Date**: (empty)
- To Invoice Date**: (empty)
- Invoice Limit**: 50
- From Payment Date**: (empty)
- To Payment Date**: (empty)
- Payment Limit**: 50
- Minimum Invoice Amount**: 0.00
- Maximum Invoice Amount**: 0.00
- Minimum Payment Amount**: 0.00
- Maximum Payment Amount**: 0.00
- Bank / Cash Account**: (empty)

Additional text for limits: 'System will fetch all the entries if limit value is zero.'

Expected Result

Payment is reconciled with the selected invoice and the outstanding balance is adjusted.

16. General Ledger

Purpose

The General Ledger is the detailed accounting record of submitted financial transactions in ERPNext.

Prerequisites

- ☐ Company configured
- ☐ Chart of Accounts configured
- ☐ Submitted accounting transaction available
- ☐ Accounting dimensions/supporting information available where required

Navigation

Accounting → General Ledger → Set filters → Refresh

Steps

Step 1: Select Company

Step 2: Set date range

Step 3: Apply account/party/voucher filters if required

Step 4: Refresh report

Step 5: Review debit, credit and balance

Step 6: Open voucher reference where required

Step 7: Verify accounting effect

	Posting Date	Account	Debit (INR)	Credit (INR)	Balance (INR)	Voucher Type	Voucher Subtype	Voucher No
1		Opening	₹ 0.00	₹ 0.00	₹ 0.00

1...	21-09-2026	Debtors - Q	₹ 1,050.00	₹ 0.00	₹ 1,050.00	Sales Invoice	Sales Invoice	ACC - SI

For comparison, use >5, <10 or =324. For ranges, use 5:10 (for values between 5 & 10).

Execution Time: 0.23056 sec

Expected Result

General Ledger displays the accounting entries generated by submitted transactions.

Important

Accounting effects are verified after submission of the source transaction.

17. Accounts Receivable

Purpose

Accounts Receivable tracks amounts customers owe the company for credit sales.

Prerequisites

- ☐ Company available
- ☐ Customer available
- ☐ Sales Invoice submitted
- ☐ Payment Entry available where payment has been received

Navigation

Accounting → Reports → Accounts Receivable

Steps

Step 1: Verify Customer

Step 2: Create or verify Sales Invoice

Step 3: Submit Sales Invoice

Step 4: Check invoice outstanding and due date

Step 5: Open Accounts Receivable report

Step 6: Apply Company and Report Date filters

Step 7: Review customer outstanding

Step 8: Record and allocate customer payment

Step 9: Refresh report

Posting ...	Party Type	Party	Receivable Account	Customer C...	Cost Center	Project	Voucher Type	Voucher No	Due Date	Invoiced Am...	Paid Amount	Credit Note
1	17-09-2026	Customer	ABC Pvt. Ltd. - 1	Debtors - Q			Payment Entry	ACC-PAY-2026-000...				
2	24-09-2026	Customer	ABC Pvt. Ltd. - 1	Debtors - Q			Sales Invoice	ACC-SINV-2026-000...	24			
Total										₹ 0.00	₹ 18,950.00	₹ 0.00

Expected Result

Customer-wise invoiced, paid and outstanding amounts are visible and updated after allocated payments.

18. Accounts Payable

Purpose

Accounts Payable tracks amounts owed to suppliers for goods or services purchased on credit.

Prerequisites

- ☐ Company available
- ☐ Supplier available
- ☐ Purchase Invoice submitted
- ☐ Payment Entry available where payment has been made

Navigation

Accounting → Reports → Accounts Payable

Steps

Step 1: Verify Supplier

Step 2: Create or verify Purchase Invoice

Step 3: Submit Purchase Invoice

Step 4: Check payable and due date

Step 5: Open Accounts Payable report

Step 6: Apply filters

Step 7: Record and allocate supplier payment

Step 8: Refresh report

Getting Started Administrator admin@example.com

Expected Result

Supplier-wise invoiced, paid and outstanding amounts are visible and updated after allocated payments.

19. Profit & Loss

Purpose

The Profit & Loss Statement shows income, expenses and the resulting profit or loss for the selected period.

Prerequisites

- ☐ Company configured
- ☐ Fiscal Year available
- ☐ Income and expense transactions submitted
- ☐ Chart of Accounts configured
- ☐ Transaction verification completed

Navigation

Accounting → Profit and Loss Statement

Steps

Step 1: Verify Company

Step 2: Verify submitted transactions

Step 3: Open Profit and Loss Statement

Step 4: Select Company and reporting period

Step 5: Apply required filters/dimensions

Step 6: Refresh report

Step 7: Review Income and Expenses

Step 8: Verify Profit / Loss

Expected Result

Profit & Loss displays income, expenses and the resulting profit or loss for the selected scope.

20. Balance Sheet

Purpose

The Balance Sheet shows the financial position of a company at a specific point in time through assets, liabilities and equity.

Prerequisites

- ☐ Company configured
- ☐ Fiscal Year/reporting date available
- ☐ Chart of Accounts configured
- ☐ Opening balances verified where applicable
- ☐ Accounting transactions submitted

Navigation

Accounting → Balance Sheet

Steps

- Step 1: Verify Company
- Step 2: Verify opening balances
- Step 3: Verify submitted transactions
- Step 4: Check General Ledger
- Step 5: Open Balance Sheet
- Step 6: Select reporting date/period
- Step 7: Apply required filters/dimensions
- Step 8: Review Assets, Liabilities and Equity
- Step 9: Verify Assets = Liabilities + Equity

Expected Result

Balance Sheet displays the company's assets, liabilities and equity for the selected date/period.

21. Trial Balance & Accounting Verification

Purpose

Trial Balance and related reports are used to verify the accounting position and confirm that posted entries are complete and balanced.

Prerequisites

- ☐ Company configured
- ☐ Accounting transactions submitted
- ☐ Opening balances completed where applicable

Navigation

Accounting → Trial Balance / General Ledger / relevant financial reports

Steps

Step 1: Select Company

Step 2: Set reporting date/range

Step 3: Generate Trial Balance

Step 4: Review account balances

Step 5: Compare with General Ledger

Step 6: Review Profit & Loss and Balance Sheet

Step 7: Investigate unexpected balances

Step 8: Complete verification

Expected Result

Accounting balances are reviewed and discrepancies can be traced to source transactions.

22. Closing Books / Period Closing

Purpose

Closing Books is the period-end process used to finalize a financial period after transactions, adjustments, reconciliations and financial reports have been reviewed. The Period Closing Voucher transfers net Income/Expense balances to the selected closing account.

Prerequisites

- ☐ Company and Fiscal Year available
- ☐ Routine transactions completed
- ☐ Bank reconciliation completed where applicable
- ☐ Receivables and Payables reviewed
- ☐ Stock verified where applicable
- ☐ Fixed Assets and depreciation reviewed where applicable
- ☐ Taxes and adjustments completed
- ☐ Financial reports reviewed
- ☐ Approved closing account identified
- ☐ Backup/approval available where required

Navigation

Accounting → Period Closing Voucher → New

Steps

Step 1: Complete period transactions

Step 2: Verify General Ledger and Trial Balance

Step 3: Review Profit & Loss and Balance Sheet

Step 4: Confirm closing account

Step 5: Create Period Closing Voucher

Step 6: Select Company and Fiscal Year

Step 7: Set closing date and closing account

Step 8: Save and review

Step 9: Submit voucher

Step 10: Verify closing entries and reports

Expected Result

Period is closed according to the approved accounting process and closing entries are reflected in the General Ledger.

Important

Do not use the closing voucher to hide unexplained differences. Correct underlying transactions first.

23. Accounting Reports & Control Checks

Purpose

Accounting reports provide verification of transactions and the financial position of the company.

Prerequisites

- ☐ Submitted accounting transactions available
- ☐ Correct Company and reporting period identified

Navigation

Accounting → Reports

Steps

Step 1: Run General Ledger

Step 2: Run Accounts Receivable

Step 3: Run Accounts Payable

Step 4: Run Profit & Loss

Step 5: Run Balance Sheet

Step 6: Run Trial Balance

Step 7: Compare reports where required

Step 8: Trace unexpected balances to source vouchers

Expected Result

Required accounting reports are generated and reviewed for the selected reporting period.

24. Common Errors & Troubleshooting

Purpose

This section covers common transaction and configuration issues identified in the Accounting reference material.

Prerequisites

- ☐ User has permission to view the affected transaction or configuration
- ☐ Correct Company and accounting period identified

Navigation

Open the affected transaction/report and review the underlying configuration

Steps

Step 1: For mandatory-field errors, complete fields marked as required

Step 2: For wrong Company, verify the selected Company

Step 3: For missing accounts, check Chart of Accounts and Company

Step 4: For unbalanced Journal Entry, verify Total Debit = Total Credit

Step 5: For unallocated payment, check Payment Entry and use Payment Reconciliation where required

Step 6: For incorrect tax, verify Tax Template, tax account, tax rate and applicable CGST/SGST/IGST treatment

Expected Result

Underlying configuration or transaction data is corrected and the accounting document/report can be processed or verified.
